

Amendments to the Claims:

This listing of the claims will replace all prior versions, and listings, of claims in the application:

Listing of the Claims

1. (Currently Amended) A furniture or structural fitting ~~consisting of~~ comprising a first fitting part ~~(1)~~ and a second fitting part ~~(2)~~ connected to the ~~former by means~~ first fitting part by an elevation adjustment apparatus ~~(4)~~, such that on the first fitting part ~~(1)~~ a threaded spindle ~~(5)~~ is seated in two bearings ~~(6, 7)~~ arranged at ~~some~~ a distance from one another, so as to be capable of rotation, but incapable of being repositioned axially, such that a threaded sleeve ~~(8)~~ that is connected to the second fitting part ~~(2)~~ is engaged with the threaded spindle ~~(5)~~ between the two bearings ~~(6, 7)~~ so that its axial position may be adjusted, and the second fitting part ~~(2)~~, ~~which exhibits the threaded sleeve (8)~~, is guided ~~by means of~~ a longitudinal guiding apparatus on the first fitting part ~~(1)~~, so as to be incapable of being rotated.
2. (Currently Amended) A furniture or structural fitting according to Claim 1, ~~characterized in that~~ wherein the longitudinal guiding apparatus ~~exhibits~~ includes at least one guide plate ~~(12)~~ that is rigidly connected to the second fitting part ~~(2)~~, ~~which and~~ is accommodated in a flat pocket ~~(13)~~, formed by the first fitting part ~~(1)~~ such that ~~it's~~ a position of the at least one guide plate may be shifted longitudinally.
3. (Currently Amended) A furniture or structural fitting according to Claim 2, ~~characterized in that~~ wherein the pocket ~~(13)~~ is formed between a central section ~~(14)~~ of the first fitting part ~~(1)~~ and a wall surface to which the first fitting part ~~(1)~~ is attached.

4. (Currently Amended) A furniture or structural fitting according to Claim 1, ~~characterized in that~~ wherein the second fitting part ~~(2)~~ is connected, by way of a hinge ~~(17)~~ having a hinge axis that runs parallel to the axis of the threaded spindle ~~(5)~~, with an attachment plate ~~(19)~~, so as to be capable of rotating.

5. (Currently Amended) A furniture or structural fitting according to Claim 1, ~~characterized in that~~ wherein the threaded spindle ~~(5)~~ is axially supported at both ends in opposite directions on the ~~allocated~~ bearings ~~(6, 7)~~ in each case.

6. (Currently Amended) A furniture or structural fitting according to Claim 2, ~~characterized in that~~ wherein the threaded spindle ~~(5)~~ ~~exhibits~~ includes, at both ends, outside the ~~individual bearing (6, 7)~~ bearings in each case, a thickened head ~~(10 or 9, respectively)~~.

7. (Currently Amended) A furniture or structural fitting according to Claim 3, ~~characterized in that~~ wherein one of the two heads ~~(10)~~ of the threaded spindle ~~(5)~~ exhibits a wrench projection profile.

8. (Currently Amended) A furniture or structural fitting according to Claim 4, ~~characterized in that~~ wherein the wrench projection profile is one of an internal hexagonal profile, a cross-slit ~~or~~ and a transverse slit.
